1. INTRODUCTION

The "Status of Industrial Land in the City of Edmonton" report has been issued annually since 1970. It presents an inventory of vacant industrial land and records the annual industrial land development and servicing activity. The report covers only land which is districted for industrial use. Land which is in an approved industrial area structure plan, but which is not districted for industrial use according to the Land Use Bylaw, is not included in the report. The report also includes an inventory of industrial land in the area annexed to Edmonton on January 1, 1982. Data measuring aspects of consumption and supply of vacant industrial land are reported at three levels of aggregation: the total city, the area inside the pre-annexation boundary and the annexed area, and the industrial plan areas (see Map 1). Much of the information is provided for the years 1984 to 1986. Information on the amount, servicing status and land use districting of vacant industrial land in each industrial subdivision is available by calling the Planning and Building Department at 428-3571.

This report of December 31, 1986, presents data on the following:

a) Industrial building activity. Section 4 shows the amount of industrial land on which building permits were issued by land use district. The yearly dollar value of industrial building permits is also discussed in Section 4.

b) Industrial land servicing. Section 5 shows the amount of industrial land serviced at the city-wide level.

c) Section 5 shows the city-wide inventory of vacant industrial land. The inventory classifies industrial land as follows:

   i) year-end supply of fully serviced vacant industrial land by land use district;

   ii) year-end supply of IB, IM and IH districted land. This includes both serviced and unserviced land;

   iii) year-end supply of industrial reserve (AGI) land;

   iv) year-end supply of vacant industrial land in the annexed area.

   Industrial redistricting and subdivision activity is also shown in Section 5.

No conclusions should be drawn from the statistics presented with respect to vacant serviced land available for second or third party development. Of the 1,108 hectares* of vacant fully serviced and rural serviced industrial land, 577 hectares were available for purchase or lease.[1] For specific information on land availability, the Manager of Industrial Development in the Edmonton Economic Development Authority should be contacted at 424-7870.

The report includes maps for each subdivision in the three main industrial plan areas (the south, southeast and northwest areas). The maps indicate vacant parcels, servicing status and land use districts. Industrial land in the annexed area is mapped at a more general level.

* 1 hectare = 2.471 acres

CITY OF EDMONTON BOUNDARY EFFECTIVE JAN. 1, 1982

2. SUMMARY

2-1 Industrial Development

Industrial development activity is at a low level. In 1986, 16.5 hectares of industrial land were built on. This is a decrease from 1985 when 23 hectares were absorbed. The value of industrial building permits in 1986 was also low at $13.25 million. Only one hectare of industrial land was serviced during the year.

2-2 Industrial Land Supply

There are 4,544 hectares of vacant land districted for industrial use in Edmonton. Of this supply, 950 hectares are fully serviced, 158 hectares are serviced to rural standards (defined in Chapter 3) and 3,436 hectares (most of which are in the annexed area), are unserviced. 66% of the serviced supply is evenly distributed between IB and IM land use districts, 19% is divided between IH and AGI districted land and 15% is distributed among various land use districts in the annexed area.

Figure 2-1 Industrial Development, Serviced Land and Servicing Activity

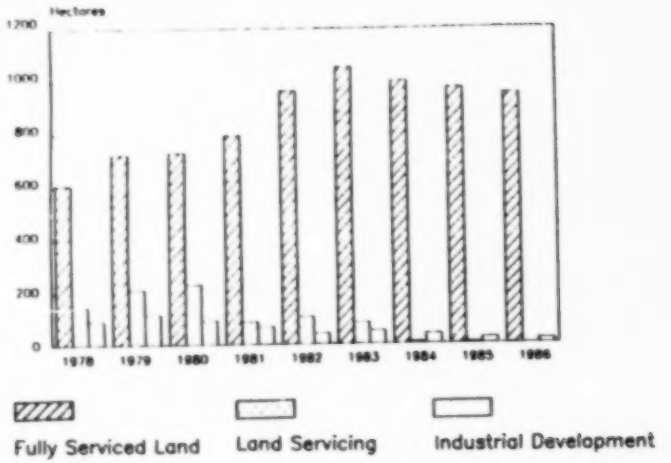

TABLE 2-1 ANNUAL INDUSTRIAL DEVELOPMENT, SERVICED LAND SUPPLY AND SERVICING ACTIVITY

HECTARES

	1972	1973	1974	1975	1976	1977	1978	1979	1980	1981	1982	1983[1]	1984	1985	1986

1 A revised data base was used to compile the 1983 figures. 12 hectares of the 67 hectare increase in the amount of fully serviced land in 1983 was due to the revised base.

3. DATA, SOURCES AND DEFINITIONS

Data used to prepare this report are obtained from City Departments. The following list will assist in identification of data sources and in interpretation and definition of terms.

3.1 Data and Data Sources

The Planning and Building Department is the source of data on industrial servicing, land use districts and building permits.

The Assessment Department is the source of data on the amount of vacant industrial land in the major industrial areas - the South, Southeast and Northwest Plan Areas.

The Real Estate and Supply Services Department is the source of statistics on City-owned industrial land.

3.2 Definitions

"Annexed Area" refers to the area annexed to the City of Edmonton on January 1, 1982 (See Map 1). The annexed area is a separate category in the report. Much of the industrial land in this area is comprised of large parcels of unserviced land and is not yet zoned according to City of Edmonton land use districts.

"Industrial Plan Area" refers to legally designated District Outline Plan Areas in the City of Edmonton.

"Land Use District":

> A section of the city designated in the Land Use Bylaw text (and delineated on the Land Use Map) in which requirements for the use of land and building and development standards are prescribed.

"IB" Industrial Business District:

> A district permitting the development of light industrial uses as well as low intensity business and office parks such that no nuisance factor is evident and the development is compatible with any adjacent non-industrial district.

"IM" Medium Industrial District:

> A district permitting manufacturing, processing, assembly, distribution and repair uses, which carry out a portion of their operations outdoors or require storage areas outdoors.

"IH" Heavy Industrial District:

> A district permitting major impact industrial uses which may have detrimental effects on adjacent uses due to noise, odour, or fire hazards.

"AGI" Industrial Reserve District:

> A district establishing reserve land for future industrial development in which farms are the only permitted use. Other uses which do not involve extensive development are discretionary.

Industrial Land Use Districts in the Annexed Area

Industrial land in the annexed area has not yet been converted to City of Edmonton land use bylaw districts. The land use districts in effect at the time of annexation are still operative. This involves the land use bylaws of the Counties of Parkland and Strathcona, and the M.D. of Sturgeon. The industrial land use districts in the annexed area are briefly described below.

Former County of Parkland Lands

"IC" Industrial/Commercial district:

> The primary purpose of the industrial/commercial district is to provide for the development of industrial and commercial enterprises which generally are compatible with one another.
>
> The range of permitted and discretionary uses in this district is extremely wide and is comparable to that permitted under the IB, IM, IH and CB2 districts of the City of Edmonton Land Use Bylaw.

"ICR-DC" Industrial/Commercial Reserve - Direct Control District

This district is essentially a holding district. The specific discretionary uses are listed in the "Winterburn-South Direct Control Regulations."

"IC-DC" Industrial/Commercial - Direct Control District

Permitted uses:

In general, the area will cater to the light manufacturing, warehousing and construction industries. Other land uses being encouraged to locate in the area are commercial office space and retail commercial services such as banks, fast food outlets, service stations, etc.

Former M.D. of Sturgeon Lands

"GI" General Industrial

Permitted uses include:

Warehousing, bulk oil sales, repair and service shops, manufacturing, assembly and processing, agricultural processing, cleaning and packing and any use which, in the opinion of the Development Officer, is of a similar nature and will not be incompatible with adjacent land uses.

Further discretionary uses include commercial and recreational uses at the discretion of the Development Officer.

Former County of Strathcona Lands

"RI" Restricted Industrial

The specific permitted and discretionary uses are listed in the County of Strathcona Land Use Bylaw. The closest equivalent City of Edmonton land use district is the 1B, industrial business district.

"GI" General Industrial

The mixture of permitted and discretionary uses in this district are closest to the City of Edmonton IM, medium industrial district.

"HI" Heavy Industrial

The uses in this district are discretionary. The specific uses are listed in the County of Strathcona Land Use Bylaw. The uses allowed in this district are generally comparable to those allowed by the City of Edmonton IH land use district.

"Vacant Land" is defined as land not occupied by buildings of any type and which is districted 1B, IM, IH or AGI under the Edmonton Land Use Bylaw. This includes land used for storage.

"Industrial development" refers to building permits issued on vacant lots.

"Fully Serviced Industrial Land" refers to the area of vacant parcels of industrial land which have full servicing i.e., complete underground services and, at minimum, gravelled access roads.

"Fully Serviced (City Standards)" refers to recently annexed industrial land with full servicing.

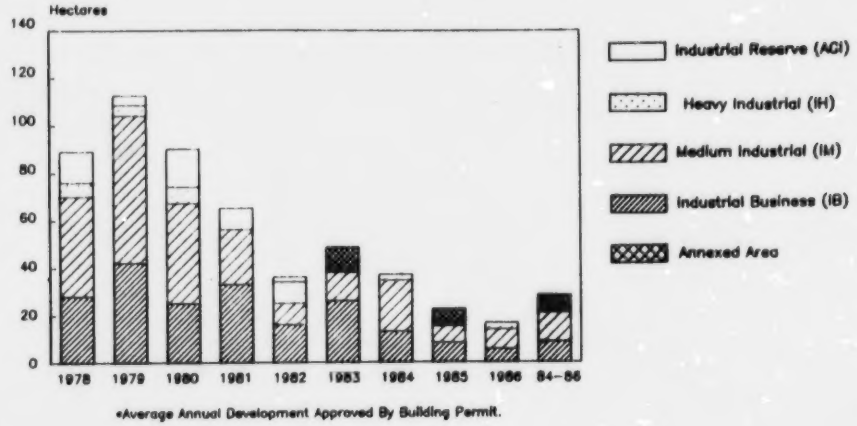
"Serviced (Rural Standards)" refers to the servicing in place in many of the industrial parks in the annexed area. This servicing consists of gravelled or oiled roads, open ditches and overhead power and telephone lines. There are no underground water or sewer lines.

4. INDUSTRIAL DEVELOPMENT

4-1 Industrial Development

In 1986, building permits were issued on 16.5 hectares of vacant industrial land (Table 4-1). This is a decrease of 6 hectares from 1985. Of the land approved for building, 34% was IB land, 50% was IM land and 16% was IH land.

Figure 4-1 Industrial Land Development



*Average Annual Development Approved By Building Permit.

4-2 Value of Industrial Building Permits

The value of industrial building permits in 1986 was $13.25 million (Table 4-2). This is a decrease of $3.12 million (19%) from 1985. Half of the 1986 permit value was for alterations and repairs rather than for new buildings. In 1985, 60% of the permit value was for alterations and repairs.

5. INDUSTRIAL LAND SUPPLY

5-1 Supply of Vacant Industrial Land

There were 4,544 hectares of vacant industrial land in the City of Edmonton at the end of 1986. Of this total, 21% is fully serviced, 3% is serviced to rural standards (defined in Chapter 3), and 76% is unserviced. A greater proportion (60%) of the total vacant land is in the annexed area. This land is largely unserviced and is in large parcels of between 10 and 65 hectares in size.

Figure 5-1 Supply of Vacant Industrial Land

	(Parcels)	(1699)	(188)	(768)	(2655)

5-2 Supply of Fully Serviced Industrial Land

At the end of 1986, the City of Edmonton contained 950 hectares of vacant, fully serviced industrial land (Table 5-2). This is a decrease of 20 hectares (2%) from the 1985 supply (building activity accounted for 17 hectares and redistricting of industrial land to non-industrial districts accounted for 3 hectares). Of this total, 805 hectares (85%) are within the pre-annexation boundary and 145 hectares (15%) are in the annexed area. Of the supply within the pre-annexation boundary, 38% is for IB use, 39% is for IM use, 12% is for IH use and 11% is industrial reserve. These land use districts have not yet been applied to land in the annexed area. Industrial land use districts in the annexed area are discussed in Chapter 3, and the location and amount of fully serviced land in this area is listed in Table 5-6.

5-3 Industrial Land Servicing Activity

During 1986, 1 hectare of IB districted land was serviced in the City of Edmonton (Table 5-3). In 1985, 5 hectares were serviced and in 1984, 6 hectares were serviced.

Figure 5-3 Industrial Land Servicing

5-4 Supply of IB, IM and IH Districted Land (Serviced and Unserviced)

860 hectares of vacant industrial land (serviced and unserviced), were designated for IB, IM and IH use within the City of Edmonton at the end of 1986 (Table 5-4). This is a decrease of 17 hectares from 1985. Of this supply, 50% is designated for IB use, 39% is designated for IM use and 11% is designated for IH use.

[1] Zoning in the annexed area has not yet been converted to City of Edmonton land use bylaw districts. For individual land use districts in this area, see Chapter 3 and Table 5-7.

5-5 Supply of Industrial Reserve (AGI) Land

There were 924 hectares of vacant industrial reserve (AGI) land at the end of 1986 (Table 5-5). Most of this land (80%) is located within the Southeast or Northwest Industrial Plan Areas.

Figure 5-5 Supply of Industrial Reserve (AGI) Land,

5-6 Supply of Vacant Industrial Land in the Annexed Area, 1986

There are six main areas of industrial land in the annexed area of the city. Of the total supply of 2,768 hectares of vacant industrial land in the annexed area, 89% is unserviced, 5% is fully serviced and 6% is serviced to rural standards. Most of the fully serviced land is located in Clover Bar or the Southeast (Annexed) area. Winterburn has the largest share (77%) of the land serviced to rural standards.

5-7 Industrial Land Subdivision Activity

During 1986, 16 hectares of industrial land (vacant and built-on) were subdivided. This subdivision activity was small in scale. In 1985, 43 hectares of industrial land (vacant and built-on) were subdivided.

5-8 Industrial Land Redistricting

In 1986, redistricting involving 28 hectares of industrial land (vacant and built-on) occurred. This redistricting activity involved mainly single lots. The figures show changes from the industrial reserve category and the more traditional industrial uses to a focus on business uses permitted by the IB or CB districts. Just over 13 hectares of industrial land were redistricted to non-industrial uses. In 1985, 31 hectares of industrial land were redistricted to other industrial districts and to non-industrial districts.
